About COVID-19:

- COVID-19 (which has also been referred to as Corona virus) is a new influenza virus that was first detected in people in the China in December 2019.
 - The COVID-19 virus is contagious and is spreading from person-to- person worldwide, similarly to how regular seasonal influenza viruses spread.
 - According to the CDC, "Flu viruses are spread mainly from person to person through coughing or sneezing by people with influenza.
 - Sometimes people may become infected by touching something - such as a surface or object - with flu viruses on it and then touching their mouth or nose."
-

Site Inspection:

- a. The area should be inspected by the technician before starting the treatment.
- b. The inspection will be based on signs of infestation.
- c. Target site of application to be observed carefully, based on which the selection of formulation, and pesticide would be decided.

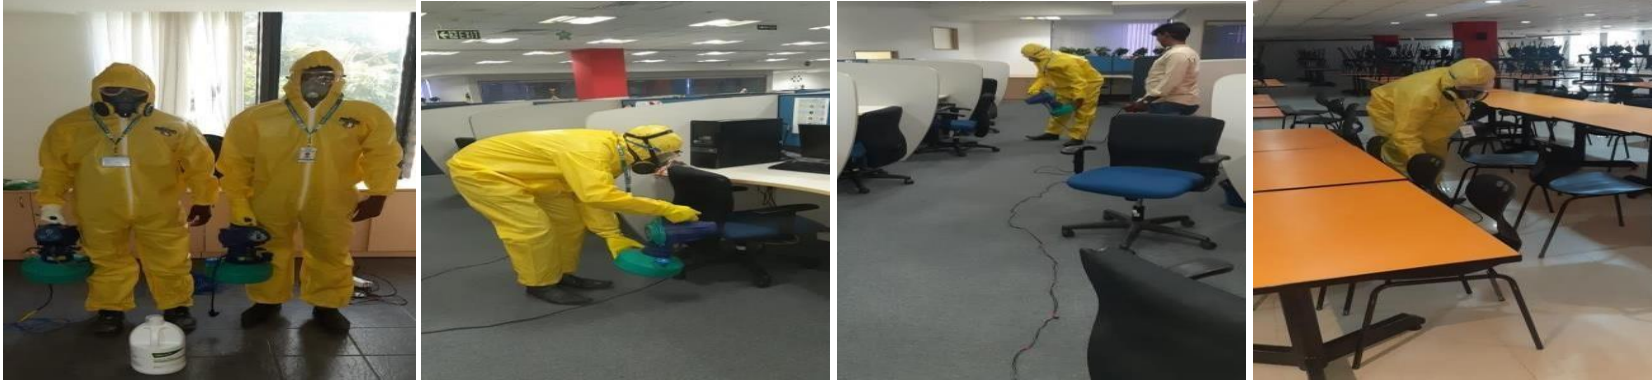

Equipment preparation in the Site:

1. From the inspection, the pesticides, application method, spraying equipment and proper PPE to be selected.
2. Prepare the site for carrying out spraying operation with the help of the client.
3. The spraying equipment should be checked for the condition of sprayer and sprayer parts by doing a trial spray with pure water.

Method of Treatment

Spraying:

- The chemical solution will be sprayed using ULV Sprayer.
- Eliminates 99% viruses with our treatment
- Wear proper personal protective equipment and place caution board in treatment area.
